Subject: information request from RT

Dear friends,

my name is Alexandra, I am producer at RT International TV channel.

We are closely following the disturbing story in Colorado - the contamination at the Gold King Mine in San Juan County. We are praising your efforts to tackle the crisis.

We have covered the news last week but now we are wondering - what has been done during the past 5 days (nearly a week actually)?

Please tell us how dangerous is the situation in the region for environment and people living nearby?

Are they allowed to take water from the river for any purposes?

How difficult will it be to clean the waters of the Animas River and how much time will it take?

Along with the statement we would be happy to have a representative of the EPA as our guest today (preferably via Skype).

Thank you so very much! Looking forward to your response!
